Search window - More options are available by clicking on "Filter". Products that have been taken off the market are hidden by default. Find parts of the product name with "\*" or all products with an empty entry.

Search without restrictions lists all products that have been reported on the company.

Only the first 100 products in the list are displayed. For a complete overview, download the "hit list" - updated only every 24h.

Sort by "CPID", "main designation", "type", "Approval/BLW number", "Status, notifier", "Last change" and "Validity" possible.

## Product search 0

Search Downloads

Click on the "Downloads" tab to get here.

Please select a product

### Please note:

There are data fields in the data output of the download where the information is only updated every 24h. Therefore it can be that the output of the download differs from the stored data array, if a change of this data was made less than 24 hours ago. Data arrays are affected where multiple entries are combined by the system. For example, entries of several H-phrases are combined by the system into one cell.
